

### **U.S. SENATE CANDIDATE MARISA DEFRANCO STANDS FIRM ON WOMEN'S HEALTH**

I stand firm in my support of the President's decision to support and protect women's health, and I would expect Elizabeth Warren, who is also a pro-choice woman, to stand firm on women's health without delay.

Support for women's health does not require a team of PR consultants to help you determine your position as the fight wages on. It is automatic for me.

The issue of contraceptive coverage is about women's health, and steadfast support of the President's decision is not only common sense, but also a requirement if you care about women and women's health.
