

Dear Friend,

While I have been running the past 7 months, I have been talking about the issues that working families care most about.

Clean, Green Jobs: With a greater direct Federal Government investment in infrastructure, we can create green jobs through means of retrofitting Federal, State and Municipal buildings by making them energy and water efficient. A significant investment in Renewable Energy subsidies will finally bring us into the 21st Century. Let's not just talk about leading the way, let's make it a reality.

Single-Payer Healthcare: The current Healthcare law as it stands is not bold enough. If we were to decouple healthcare from employment, small businesses wouldn't carry the burden of bearing additional expenses on essential benefits, thus allowing them to create more jobs. If people had longstanding healthcare for 40 years, Medicare costs would drastically decrease because Americans would have greater access to the best Doctors and specialists out there.

Standing up to the 1%: It is long overdue that Billionaires and Corporations begin paying their fair share. Let's start by removing the tax incentives these job exporters have enjoyed for years. Why not encourage businesses to stay right here to employ working families. The wealth distribution we encounter in America is seeing all of our hard-earned money get funneled straight into these job killers.

Help me in standing with working families.

[Tell the 1% that we will no longer be muzzled by contributing to my campaign today.](#)

Every dollar goes straight into our true grassroots efforts. This election will be won by you, not the pundits or special interests. Our strength was most recently seen in the North Quabbin Forum, where I had the honor of earning 1st place in the straw poll with 43.4% from grassroots activists and party regulars.

Help keep our momentum going by contributing today. Every dollar helps!

Thank you for your continued support. Franklin Roosevelt recognized that we needed the New Deal, now it's time for a Real Deal.
